

Coastline is the master distributor for GTI Bi-Fuel Systems from Altronic for the East Coast and the Caribbean.

Let Coastline help you reduce your fuel costs and extend the runtime of your diesel engine by contacting us today.

Blended fuel source

- Reduce fuel costs
- Extend the runtime of your industrial diesel engine
- Allows for operation on natural gas up to 70% of the fuel required to maintain desired speed and load
- Lowers the operational costs and emissions of your industrial diesel engine

No modifications required

- The system requires no modification to the internal components of the engine while still maintaining diesel-like performance in such critical areas as efficiency, stability, and load acceptance.
